

2011-2015 **Credit Suisse - Place Bel-Air 2 - Geneva**
 Bank building renovation partnership with Buchner Bründler AG

Atrium

View from quai de l'île

Place
 Place Bel-Air, GE

Building owner
 Credit Suisse sa

General concept

The project symbolizes the opening and the reliability. The goal is to purge the several interventions by the past to reach the initial harmony and historical pictures. Inside, the atrium space is cleared. The main representative room diffuses general opening purpose. The internal structure, orthogonal, regular and quiet refers to exterior appearance. The clear typology creates an organizational efficiency.

Energy concept

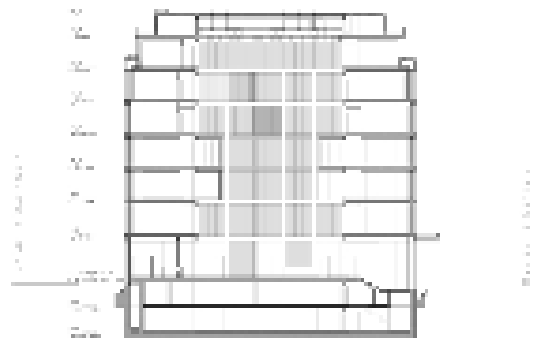

The site concept basis of Credit Suisse in Geneva is funded to network the three buildings: the one from the Bel Air, the other from Rue de la Monnaie and the third from Rue de la Confédération. This principle enables to optimize the environmental energy utilization, to value the cooling and to minimize the energy.

Services

Project and realization management service included in a consultant pool (architects and engineer specialized).
 Project and architectural direction realized by Buchner Bründler AG.
